GOAL

Travel to all the sections on the board at least once. Build stronger connections by sharing personal experiences and life stories.
Share photos and videos on social media with the hashtag ***#StrategicConnections*** to get featured on Meraki.

NUMBER OF PLAYERS

4 & more

WHAT YOU NEED

Monopoly board and pieces
Printed board overlay and cards

HOW TO PLAY

1 
The player who rolls the highest number on the dice starts the game. The player with the second highest roll becomes the banker.

2

When you land on a life section on the board you must buy it or auction it. Travel around the board buying and trading sections.

3

Each section on the board represents a phase of life. When you buy a section the banker will give you the section card.

4

When another player lands in your section, you can ask them any question related to that phase of life.

5

The section card has details about each phase of life and prompt questions you can ask the other players.

6

If a player does not want to answer a question they can pay a fee instead. But remember saving money increases your chances of winning.

7

The game ends when the first player has traveled through every phase in life and answered a question. Use the travel card to keep track of the areas you've been in.

8

Travelling through every phase gets the player a bonus of $ 500. Once the game ends players count up their money. The player with the most money wins.
